# Cyclical Combinatory

- Documents -  Articles MM -  Astrologie mondiale -

Date de mise en ligne : mardi 16 février 2016

**Description :**

Three articles on a contemporary vision of an ancient approach.

### IN WHAT CYCLES ARE WE LIVING IN ?

I invite you to discover my findings (in three articles), which lead me to imagine a new tool that seems to me pertinent in personal and mundane astrology, for interpretation and forecasting.

I would like to say that I didn't invent anything : I just applied an old principle, related to the great conjunctions theory.

Since the argument is at my sense frankly interesting, I took the trouble to translate it from French into the two languages that I can master (more or less), by order : Italian and English. I really think this approach, unpublished as far as I know, should be largely available and that's the reason why I share it as I can.

I naturally invite you to test it but I can tell you that André Vander Linden (creator of the Zodiac software) is already working hardly to put it in his program ! ;-)

You just have to click on the pdf documents below (the fourth one is the annex).

PS : Sorry for my poor English...
